

# San Antonio Teen Pregnancy Prevention Collaborative

The San Antonio Teen Pregnancy Prevention Collaborative is a Metro Health and SA2020 workgroup with a goal to decrease the San Antonio, Bexar County teen birth rate by 25%\* by the year 2020.

The collaborative follows the SA2020 Collective Impact Model\* for a common agenda, shared measurements, continuous communication, and mutually reinforcing activities.

The collaborative consists of several youth serving organizations in San Antonio who are implementing evidence-based prevention programs and or collaborating on five intervention areas (Figure 1).

Despite recent progress, the Bexar County teen birth rate for females ages 15 to 19 was **51%** higher than the National teen birth rate. Therefore, much more work needs to be done in the area of teen pregnancy prevention.

## SA2020 Collective Impact
