Average Cost - All Deliveries	\$2,995	\$2,984	\$2,972	\$2,867	\$2,696	\$2,735	\$2,735

NOTES:

Medicaid Fee-For-Service (FFS) paid and partially paid inpatient hospital delivery claims were selected using the following DRG codes:
 MS-DRG codes 765-768 and 774-775 were used to identify FFS deliveries with discharge dates in FY2009 - FY2012.
 APR-DRG codes 5401-5404, 5411-5414, 5421-5424, and 5601-5604 were used to identify deliveries for FY2013-FY2015.
 Managed Care deliveries were selected from the Delivery Supplemental Payment (DSP) database.
 Deliveries are reported as the total number of unduplicated delivery dates per patient. Patients with multiple delivery claims on the same date are counted as having one delivery on that date. Some patients had more than one delivery date per fiscal year.
 Teenage mothers were defined as delivery patients who were under age 20 on the delivery date. Non-teenage mothers were defined as mothers who were age 20 or older on the delivery date.
